The BPS904N is a robust peripheral device that combines impressive faxing, copying, colour scanning, printing and network functionality for reliable individual and workgroup use.

The BPS904N scanner features ultra-fast scanning speed up to 2.3 second per page and a built-in, high speed auto document feeder that holds up to 50 pages of paper. The BPS904N serves as a PCL5e laser printer and has 10/100 Base-T network functionality.

BLUE PRINT SOLUTIONS based in Singapore is a niche OEM distributor of office automation. BLUE only sources quality products that have the potential to create massive market penetration due primarily to the exceptional low total costs to both dealer and end user.
